

THE MINDLESS TAX OF THE DO NOT DRILL DEMOCRATS

The Do Not Drill Democrats have levied against America a huge, cruel, pervasive, and regressive tax—never originated in the House of Representatives as is constitutionally required for a normal tax, but a gigantic tax nevertheless. It is *Four Dollar gasoline*; a huge confiscation of assets. It is an ongoing transfer of wealth called by T. Boone Pickens the *largest in the history of mankind*.

It is regressive because those who suffer the most are the poorest among us—the least able to withstand its devastating effects. The Do Not Drill Democrats argue incessantly against oil and gas drilling, coming up daily with new rationalizations to oppose sane energy policies to drill now for oil and gas, which would increase supplies of gasoline and reduce upward pressure on prices.

The Do Not Drill Democrats and their *Four Dollar gasoline tax* affect every facet of our lives, with gas tank fuel costs sucking money away from alternative monetary uses and our personal financial priorities. *Their Do Not Drill intransigence attempts to bend us to their political whims*. They would deprive all of us individual choices in the uses of our own funds. They would invade our bank accounts and pry open our own purses, forcing us to lay our assets unwillingly on the altar of the god of the Do Not Drill Democrats. They would deprive our children and grandchildren of the hard-earned benefits of the lifetimes of our own labors—much as did Communists Joseph Stalin and Chairman Mao.

Four Dollar gasoline will be the deciding factor in the November election.
